*Sample taken: 25 March 2026
Sample received and analysed: 25 March 2026
Analysis completed: 27 March 2026
Sample description: **Seawater**

Sample number	Sample Description	<i>E.coli</i> cfu per 100 ml	<i>Enterococci</i> cfu per 100 ml
1	Breakwater Saldanha (mussel rafts) - 05h36	16	36
2	Small Craft Harbour - 05h42	5	55
3	Government Jetty - 05h47	4	61
4	Saldanha Bay Yacht club - 05h55	5	20
5	Pepper bay – Southern Seas Fishing side - 06h05	10	6
6	Pepper Bay – next to sewage overflow – outlet - 06h12	10	60
7	Hoedjiesbaai - 06h19	25	95

(cfu – colony forming units)

Sample temperature: 19.0°C

Ms ETHNÉ CARLSE
MICROBIOLOGIST

page 1 of 3

Accredited method/techniques used: Chromogenic agar (ecoli-coliforms) method WAL M5; WAL M6 (Enterococci)

This report relates to the samples tested and identified in this report. The laboratory does not accept responsibility for the quality of the samples in terms of temperature during transit, age, etc. supplied to the laboratory or for comments added by another party. Test reports shall be reproduced in full and not only in part. Written approval must be obtained in writing from the Laboratory manager before certain parts of the report is published or reproduced. * Indicate information supplied by customer. The Laboratory protects client's confidential information and proprietary rights by not allowing a third party access to data or any other client information unless agreed upon with customer. Laboratory will only provide data and confidential information when it is required by law or for accreditation authorities.

Please arrange with the laboratory BEFORE taking the samples. Bacteriological samples must be analysed within ± 6 hours with a maximum of 24 hours. Samples are therefore accepted by appointment only. Please allow two days for completion of the tests. This laboratory is normally closed on **Public holidays, Saturdays and Sundays.**
